Art Unit: 3748

Applicant's amendment dated November 24, 2008, has been fully considered.

Applicant has amended the claims to overcome the rejection of the previous Office Action. However, a new ground of rejection has been made based on the GB 2261705 (Strafford) submitted with this amendment.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 83-85 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2261705 (Strafford).

Strafford discloses a tower 1 that covers a large area including building inside a solar roof 8, air inlet 4, heat exchanger 5, turbine 6, outlet on top of the tower, the electricity is used to supply to the building or to the tower itself which can also be considered as a high-rise building. Page 2, fourth paragraph clearly discloses the inside of the tower can be formed with helix or spiral passages that have swirls. Page 3, fourth paragraph discloses the vortex. Page 7, fourth paragraph compares this tower with Eiffel tower which is a high-rise building as claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3748

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 86-106 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Strafford. Strafford discloses all the claimed subject matter as set forth above in the rejection of claim 83, but does not disclose the valve assembly and different designs for the helix including stairways, cladding etc. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to select valve assembly and different helix designs in Strafford for the purpose of achieving appropriate work output.

Claims 107-108 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3748

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
